

Quick Repair Lite System Administrator Training

Maximizing the Return on Your Derby Solution

Class Description

This is a half day training class where students will learn how to use QuickRepairLite (QRL) to enter and review test and repair data, and how to configure new operator environments. Students will learn about the QRL board graphics, and gain a detailed understanding of the QRL user interface. They will learn how to perform all maintenance and system administration tasks, and how to deliver QRL Operator Training

Target Student

This training class is intended for QRL System Administrators.

Recommended Pre-requisites

- ❑ *Microsoft Windows and networking basics*
- ❑ *Keysight 3070 testplan and data logging basics*

Class Topics

- ❑ **Overview of QRL** – describes the Derby family of products and how QRL works with the other products.
- ❑ **Graphical User Interface** – provides a detailed look at the QRL graphical user interface including the specific features and functions of each interface element.
- ❑ **File System Structure** – gives an understanding of what is installed on the system, and identifies areas of the file system the administrator will need to be familiar with to configure and maintain QRL.
- ❑ **Configuring QRL** – describes how to configure the various components of QRL, e.g. commissioning new boards, configuring the data flow, etc.
- ❑ **System Administration** – covers numerous system administration tasks including: installation, generating QRL graphics, adding users, and more.
- ❑ **Operator Training** – introduces the student to the training materials they can use to train their operators.

Class Goal

Upon completion of this course, students will be able to:

- ❑ *configure QRL operator environments*
- ❑ *perform QRL sys admin tasks*
- ❑ *maintain the QRL database*
- ❑ *provide QRL operator training*

Class Scheduling

Training class location and schedules are flexible and can be tailored to meet the needs of Derby's customers. On-site and off-site classes can be scheduled in the US, Europe and Asia.

Derby Associates International is an independent software company that specializes in cloud-computing solutions for the electronics manufacturing industry. Derby offers a range of web-based data collection and data analytics solutions that are being used by many leading electronics companies to facilitate real-time decision support across today's global electronics manufacturing supply chain.
