

ReX Sys Admin Training

Maximizing the Return on Your Derby Solution

Class Description

This is a 1-day training class where students will learn how to use ReX in a variety of modes to enter and review test and repair data, and how to configure new operator environments. Students will learn about the ReX board graphics, and gain a detailed understanding of the ReX user interface. They will learn how to perform all maintenance and system administration tasks, and how to deliver ReX Operator Training

Target Student

This training class is intended for ReX System Administrators, and advanced ReX Users.

Recommended Pre-requisites

- ❑ *Linux System Administration*

Class Topics

- ❑ **Troubleshooting** – provides recommended troubleshooting procedures
- ❑ **Overview of ReX** – describes the Derby family of products and how ReX works with the other products.
- ❑ **Graphical User Interface** – provides a detailed look at the ReX graphical user interface including the specific features and functions of each interface element.
- ❑ **File System Structure** – gives an understanding of what is installed on the system, and identifies areas of the file system the administrator will need to be familiar with to configure and maintain ReX.
- ❑ **Data Flow & Internal Operations** – covers data flow through ReX, and resource file usage.
- ❑ **Configuring ReX** – describes how to configure the various components of ReX, e.g. commissioning new boards, configuring the Data Manager, resource files, etc.
- ❑ **System Administration** – covers numerous system administration tasks including: startup/shutdown, maintaining the database, network troubleshooting, adding users, and more.
- ❑ **Operator Training** – introduces the student to the training materials they can use to train their operators.

Class Goal

Upon completion of this course, students will be able to:

- ❑ *configure ReX operator environments*
- ❑ *perform ReX sys admin tasks*
- ❑ *maintain the ReX database*
- ❑ *provide ReX operator training*

Class Scheduling

Training class location and schedules are flexible and can be tailored to meet the needs of Derby's customers. On-site and off-site classes can be scheduled in the US, Europe and Asia.

Derby Associates International is an independent software company that specializes in cloud-computing solutions for the electronics manufacturing industry. Derby offers a range of web-based data collection and data analytics solutions that are being used by many leading electronics companies to facilitate real-time decision support across today's global electronics manufacturing supply chain.
